ABBREVIATIONS	xiii
GLOSSARY.....	xiv

INTRODUCTION: UNFULFILLED PROMISE THE FAILURE OF INTERNATIONAL HEALTH AND DEVELOPMENT STRATEGIES TO PROTECT CHILDREN'S LIVES AND HEALTH

A rude awakening: cholera makes a deadly comeback.....	2
The 1994 Rwanda-Zaire cholera outbreak: the tragic cost of not promoting a local solution.....	5

PART 1: THE RISE AND FALL OF PRIMARY HEALTH CARE

INTRODUCTION TO PART 1.....	10
-----------------------------	----

CHAPTER 1 The Life and Death of One Child: Rakku's Story

The chain of causes	11
What caused the baby's death?	12

CHAPTER 2 The Historical Failures and Accomplishments of the Western Medical Model in the Third World

The development debate.....	13
The evolution of third world health policies: Western medicine as a tool of colonial domination	13
Attempts to reform the Western medical model.....	14
The negative effects of the Western medical model.....	15
The germs of reform.....	15
Adapting community-based approaches to national health systems	16

CHAPTER 3 Alma Ata and the Institutionalization of Primary Health Care

The social and political implications of Primary Health Care and the Alma Ata Declaration	18
Resistance to Primary Health Care	19
The use of the Alma Ata Declaration to neutralize successful community-based health work.....	19
The Declaration of Alma Ata.....	21

CHAPTER 4 The Demise of Primary Health Care and the Rise of the Child Survival Revolution

From Comprehensive to Selective Primary Health Care	23
Another setback to Comprehensive Primary Health Care:	
The global recession of the 1980s	23
The Child Survival Revolution: an adjustment policy for health	24

CHAPTER 5 Health Care as if People Mattered

Concepts that need to be challenged.....	26
Technological solutions to social problems: can they succeed?	26
Survival versus quality of life: is survival enough?.....	26
After Alma Ata: what happened to community participation?	27
Health through behavioral change and female education: blaming the victim.....	27
Social mobilization: UNICEF's shift from bottom-up to top-down.....	28
From awareness-raising to brainwashing: social marketing	29

CONCLUSION TO PART 1	30
----------------------------	----

PART 2: ORAL REHYDRATION THERAPY A SOLUTION TO DEATH FROM DIARRHEA?

INTRODUCTION TO PART 2	32
CHAPTER 6 Diarrhea: A Leading Killer of Children	
Introduction	33
The evolution of diarrhea management: old wine in new bottles	34
Discovery of ORT	35
ORT—The magic bullet for Child Survival.....	36
Access rates, use rates, and effective use of ORT	36
“Resting the gut”—a harmful practice introduced mainly by western doctors	39
Does ORT prevent child death?.....	40
CHAPTER 7 The Oral Rehydration Debate: ORS Packets or Home Fluids	
Which groups favor packets and which favor home-made drinks?.....	43
Irrational use of ORS.....	46
The problem of not getting ORS packets when they are needed	47
Economic perspectives in the ORS-ORT debate	48
The impact of commercial ORS on the poor.....	48
Is Egypt’s costly success story sustainable?	49
The need for studies correlating family ORS expenditures with child malnutrition	51
Does the end justify the means?.....	51
The “success” of marketing	52
Zimbabwe’s lone stand for self-reliance.....	53
CHAPTER 8 Controversial Issues Affecting the Success of ORT Initiatives	
Underuse of ORT and overuse of drugs	54
What’s in a name? Mystification versus demystification	56
A simple solution or a magic medicine?.....	56
The Piactla wonder drug: a big mistake.....	57
“Boil the water” and other misguided health messages.....	58
Blunders in the formula for success: how much salt?	59
Reducing the salt content and osmolarity of the WHO-UNICEF “standard formula ORS”.....	60
WHO’s latest guidelines for home fluids	61
CHAPTER 9 Food as a Key Part of ORT	
Which causes malnutrition: infection or lack of food?.....	62
The changing concept of ORT: food-based therapy.....	63
Breast milk—An ideal rehydration drink	64
CHAPTER 10 Food Based ORT	
Cereal-based versus sugar-based ORT	66
Why cereals work better.....	67
Summary of arguments in favor of cereal-based ORT	68
Considering the demands on mothers	68
A poorly considered warning: “Do not use weaning foods to make ORT”	69
Additional objections to cereal-based ORT.....	70
Building on local traditions: “soured porridges” as homemade ORT	70
Kishk neshif—a traditional CB-ORT with a storage life of months.....	70
Advantages of soured (fermented) cereal-based porridges	71
Adding germinated flour for higher energy ORT	71
CONCLUSION TO PART 2	72

PART 3: WHAT REALLY DETERMINES THE HEALTH OF A POPULATION?

INTRODUCTION TO PART 3	74
CHAPTER 11 Health Status in Different Lands at Different Times in History A Comparative Perspective	
Health indicators in populations.....	75
Development in the “developed” world	77
The development of underdevelopment.....	78
Underdevelopment of the Third World as an ongoing process	79
From trickle down to trickle up.....	80
Third World development—of massive foreign debt.....	81
Current threats to health—the debt crisis, recession and adjustment.....	82
Structural Adjustment Policies: rescuing the rich at the expense of the poor.....	83
Components of structural adjustment.....	83
Why does structural adjustment not slash military budgets instead of health and education?	85
CHAPTER 12 Healthy Profits in a Dying World: Three “Killer Industries” and Their Impact on Children’s Health And Survival	
Corporate greed versus human need	87
The infant formula industry: high profits and dying babies	89
Breastfeeding—the best protection against death from diarrhea.....	90
Summary of the international code of marketing of breast-milk substitutes	91
The pharmaceutical industry: unscrupulous promotion of useless and dangerous drugs	92
High cost of medicine can be deadly	94
Transnationals’ and the World Bank’s attack on essential drug policies	95
Ciba-Geigy’s dark history with drugs for diarrhea—and its friendship with WHO.....	96
WHO’s relationship with Galactina S.A.	97
Arms and military equipment—a 750 billion dollar-a-year industry	98
CHAPTER 13 Turning Health Into an Investment: The World Bank’s Death Blow to Alma Ata	
Privatization of health services	102
Bamako and other cost recovery schemes	102
The World Bank’s take-over of health policy planning: <i>Investing in Health</i>	103
The Bank’s three-pronged approach	104
Disability Adjusted Life Years (DALYs).....	105
The report’s contradictions and wider agenda.....	106
CHAPTER 14 A Look at the Situation Today: Equity as a Determinant of Health	
Poor health at high cost—the socioeconomics of health and health care in the United States	108
Startling statistics on U.S. health, race, and equity	111
Inequality breeds violence.....	111
The United States and the globalization of poverty	112
The socioeconomics of health in the Third World	113
Good health at low cost.....	114
How sustainable is “good health at low cost?”—Trends since the Rockefeller study	115
Lessons to be learned from the “good health at low cost” countries	117
The health achievements of Cuba	117
Guyana’s experiment with an equity-based alternative to structural adjustment	118
An alternative path based on people’s needs.	118
CHAPTER 15 Equity as the Sustainable Solution to Population Growth and AIDS	
Is population control an answer to today’s global crises?.....	121
Should children in an “exploding population” be allowed to die?	122
Low population growth rates in poor countries	123
Socioeconomic factors, not birth control, as the chief determinant of birth rates	124
Aids in the third world—a disease of poverty and structural injustice.....	124
Poverty-driven migrant labor and the spread of AIDS.....	125
What can be done to halt the spread of HIV/AIDS?	126

CONCLUSION TO PART 3	126
----------------------------	-----

PART 4: SOLUTIONS THAT EMPOWER THE POOR: EXAMPLES OF EQUITY-ORIENTED INITIATIVES

INTRODUCTION TO PART 4	128
------------------------------	-----

CHAPTER 16 Health Care, Empowerment, and Social Change

Equity, participation, and empowerment	129
Solutions that empower the poor.....	130
Diarrhea management as a process of empowerment.....	130
The empowerment process.....	131
The methodology of Paulo Freire applied to health care	132

CHAPTER 17 Community Based Diarrhea Control in Mozambique

Commitment to <i>Health for All</i> amidst war	133
Problems with the standard ORS approach.....	133
Seeking the advice of village women	134
The pilot program in Nampula	135

CHAPTER 18 Zimbabwe's National Children's Supplementary Feeding Program

Economic adjustment.....	138
Preparing for crisis	138
Immediate, short-term relief.....	139
Long-term nutritional education	140
Local production of supplementary food.....	140
Impact on children's health	141

CHAPTER 19 From Village Health Care to the Struggle for Land and Social Justice: an Example from Mexico

Project Piaxtla	142
Piaxtla's evolution: from curative care to social action	143
Actions to defend the health and rights of the least advantaged.....	143
The farmworkers-run maize bank	144
The cooperative fencing program.....	144
Women unite against men's drunkenness.....	145
The invasion and redistribution of large land holdings.....	145
New threats to the peasants' gains: free trade and the global economy	146
Free trade in poverty, racial violence, repression, and AIDS.....	147
Summary of the impact on Mexico of NAFTA and the Structural Adjustment/Austerity measures intensified after the December, 1994 crash of the peso	148
The Chiapas uprising to the rescue.....	149
Village and global health are now inseparable.....	150

CHAPTER 20 Health Care in the Context of Social Revolution: The Example of Nicaragua

The Somoza regime: 1932-1979.....	153
The effect of Nicaragua's changing political system on health.....	154
The Sandinista Period: 1979-1990	154
Internal disputes and contradictions	155
Power to the people?	156
Popular participation in action: The Measles Monster.....	157
The impact of the U.S. destabilization campaign on health care and health	157
The Chamorro government: 1990 to the present	158
More U.S. aid, less health	158
Why did the United States consider Sandinista Nicaragua a threat to its national security?	159

PART 4: CONTINUED

CHAPTER 21	Health for No One, or Health for All: The Need for a Unified Effort from the Bottom Up	
	The evolution of social responsibility—and recent reversals	161
	Toward a healthier society.....	162
	Laying the groundwork for change: a strategy for health improvement	162
	How healthworkers can lay the groundwork for change	163
	1. Suggestions for those involved in community health or development work	163
	2. Suggestions for teachers, writers, and communicators.....	163
	3. If you are an activist, a community organizer, a member of a group of disadvantaged people, or a concerned citizen working for change	164
	Forge alliance with other groups struggling for their rights	164
	The need for a grassroots united front for world health.....	165
	African social scientists unite in favor of an equity-oriented alternative	166
	The Ukunda Declaration on economic policy and health.....	166
	The International People’s Health Council	169
CONCLUSION TO PART 4:	The need for a “child quality-of-life revolution”	170
APPENDIX	The Role of UNICEF and WHO	171
READING LIST	Key Readings Relevant to The Politics of Health	177
