# **THE WONDROUS TOY WORKSHOP:**

## An exciting new book by Nancy B. Miller

### Foreward by David Werner

*The Wondrous Toy Workshop* is a practical how-to-do-it book about making toys. It is also an inspiring story about helping disadvantaged children build worthwhile lives for themselves, realize their creative potential, and gain self-esteem.

The heroine in this mesmerizing story by Nancy Miller is a down-to-earth older woman named Hanni Sager, who herself has a physical disability. Perhaps because of her own impairment, Hanni developed a remarkable understanding of human nature and human needs, along with a deep empathy for young people in difficult circumstances. I (David Werner) first learned of Hanni's toys long before I learned of Hanni. Years ago, when a group of us from PROJIMO visited Piña Palmera, we saw the eagerness and artistic creativity with which the youngsters there were making playful, stimulating toys. We took back samples and set about making similar playthings, with disabled children together with schoolchildren, in PROJIMO's own "Children's Toy-Making Workshop." Everyone, young and old, loved the way the imaginatively painted animals and birds, cowboys and señoritas, flapped their wings or did summersaults. It was hard to say which was more fun, making the toys or playing with them.

This uplifting book provides simple, clear instructions—complete with helpful line drawings—on how to create a menagerie of popular toys. Both the toys and the children making them are brought to life in a kaleidoscope of colorful photos.

But equally moving is Hanni's own story which is beautifully told by her friend

Nancy Miller, who lovingly portrays the way Hanni learned help the children discover their creative potential, and how Hanni herself grew in the process. Hanni's refreshing insight into the "psychology of vulnerable children" comes not from an academic background but from opening up her heart to the children and encouraging them to do the same with her and with each other.

The beauty of Nancy Miller's book—apart from the simple charm of the toys themselves—is the spectrum of stories she tells about the sundry children involved. Although the focus is on making toys, the empowering approach to working with disabled and marginalized children makes *The Wondrous Toy Workshop* a groundbreaking contribution to the "pedagogy of the disadvantaged."

### **Spanish Training Program**

at PROJIMO in rural Mexico  
in the village of Coyotitan, 40 miles NW of Mazatlan

- Learn conversational Spanish in a rural setting.
- Volunteer in an innovative, empowering, community-based project.
- Begin any time. Stay as long as you choose.
- Individual instruction by disabled villagers.
- Live and practice Spanish with a local family.
- Typical Mexican food (vegetarians welcome)
- Health workers, activists, and disabled travelers especially welcome.
- Cost: US\$200 per week—room and meals included.
- Wheelchair accessible

For more information on the program, see:  
[www.healthwrights.org/spanishtraining.htm](http://www.healthwrights.org/spanishtraining.htm)

To arrange a visit, contact the program at:  
Proyecto PROJIMO A.C.

Coyotitan, San Ignacio, Sinaloa, Mexico  
Tel and Fax: 011 52 (696) 962-0115
